

What families need to know about... Elementary Math Digital Resources

The BCPS Office of Mathematics has created a digital resource site to support families and students at home.

Take a moment to check out these important areas on the page!

The digital learning objects have been identified to provide students with multiple opportunities to review concepts and practice skills.

LEARN • PRACTICE • ASSESS

- Learn: video resources that provide detailed explanations of concepts.
- Practice: math problems with immediate feedback (answers) and "hints" are available.
- Assess: self-assessment tools allow students to monitor and record their progress and next steps.
